

JONATHAN MENDOZA

SOFTWARE ENGINEER

San Diego, CA

jonatmendoza@gmail.com
www.jonathanmendoza.dev

I have a graphic design background and my creativity through design has led me to a career change into full stack web development. My most recent experiences have been in startup environments, loaded with tight deadlines and multiple responsibilities. As a developer I'm always looking to learn and implement new methods or new approaches to any problem.

SKILLS

- HTML, CSS, Javascript, Python
 - ReactJS, Redux, NodeJS, Express.js
 - GraphQL, Apollo, Prisma
 - Adobe Suite, Premiere, After Effects, Adobe XD, Lightroom
-

EDUCATION

Lambda School

Full-stack Web Development | 2020
Lambda School's full-stack web dev course is 9+ months of Front-end, Back-end and Computer Science. The program is 100% remote using large video conference lectures.

UC San diego extension

Digital Content Creation | 2019

- Created content for a variety of platforms
- Learned how to plan and create content for high-impact campaigns
- Introduced to Content Management Systems (CMS)
- Learned photography and motion graphics to enhance content.

WORK EXPERIENCE

FREELANCE GRAPHIC DESIGNER

Self-Employed | 2018 - Present

- Advise clients on the best strategies to use for their particular products and desired audiences.
- Create unique images, video post, & logos for customers.
- Created style guides and marketing templates for new companies being launched.

GRAPHIC DESIGNER

ReviewBuzz | 2014 - 2017

- Manage video content to expand our marketing distribution and build new content.
 - Translated discussions into leading on-demand designs and layouts
 - Built and implemented a content library to easily access marketing collateral for the sales team.
-

PROJECTS

ResumeQ [Project Link](#) | [Code](#)

React | Apollo | Node | Express | GraphQL

A micro-service of Quality Hub that allows users to search through a marketplace of qualified resume coaches and request a review of their resume.

- Migrated database to PostgreSQL for data persistence
- Connected ResumeQ backend & Core backend in Apollo Federation
- Implemented CRUD functionality with tables
- Maintained consistent styling from previous designs of Quality Hub

Recipe API site | [Project Link](#) | [Code](#)

React | useHooks | API | Styled-Components

A single page app where users can browse the Tasty API for recipes by ingredients. Users can view videos and list of ingredients

- React JS using hooks
- Styled application with Styled-Components
- RapidAPI
- Built Modal and Pagination from scratch

Barca-Memory Game | [Project Link](#) | [Code](#)
JS | HTML | CSS

The memory game is a basic matching game. In a deck of paired cards, the player needs to match each pair to win the game.

- Applied JS fundamentals for game logic.
- Animations were done with CSS3
- 3D tilt effect done with JS library Vanilla-tilt
